**Description and Hazards:** All roads are narrow and winding, through the mountains. Some sections are paved and others are graveled. **Not recommended for RVs**. Most sections are one-lane with blind curves and turnouts. Always look ahead, as slides, rocks, other shuttle vehicles and logging trucks may be encountered. There are no gas stations or services along these routes so be prepared with a full tank of gas and plenty of water. Snow usually blocks passage in the winter (November – April). Highway 199 is the winter route. RVs should use Highway 199 year round.
